

## The END is NOW by Carsten Martin Ploss (© 2009)

The Reality is an illusion and the Illusion seems to be real.

It all depends on our will to create an Imagination strong enough to survive the outer influence on our will.

Nothing happens randomly. Once aware there will be ways to accomplish the puzzle and everything will be an open book – empty with no letters anymore.

There are only three conditions. And the third is the clue.

CREATION, DESTRUCTION and the NEUTRAL – BALANCE.

It always is and it always will be.

ALL is NOTHING at the same time.

**The END is NOW.**

Each Action will cause a reaction. The Circle is always completed – always. Every action will cause a reaction in the future – a reaction which is the balanced result of the creative or destructive action.

Choose the area of creation and destruction carefully. It will be a part of the circle and accomplish it – complete it – round it off – just in time.

Conditional Imaginations will cause confirming thoughts which will lead to reality building actions and appearances.

We attract appearances to our real illusion.

Nothing is solid - everything is in motion – even if your organs are not able to sense it.

The fine comes first – it is the essence of everything solid – of your body – and all you can sense.

**Your Spirit - always is and always will be.**

**Your Soul - is the accompanying condition.**

**Your Body - is the current form of expression.**

You judge yourself by conditions – the Game you want to play – or you already played before.

In your current form of expression or the expression you had before.

The expression is the vessel of the condition.

And the condition is a part of the complete Balance.

Beginning and End at the same time.

It exists inside you and all around you.

What comes next will be the balance – it always is and it always will be.

But there is no random condition - and there is nothing hidden.

The law of conditioning is also the law of non-conditioning.

Ask and you will get the answer.

Hear and follow **the sound that never dies.**
